Experience

Principal Program Manager, Sikhi.io, Seattle, WA — March 2026 — Present

- Successfully scaling the live Sikhi.io platform to over 3 million visits every month while simultaneously directing the lifecycle of multiple interconnected sub-projects, including sikhiuni.com, punjabiuni.com, sikh.jp, and sikh.ae.
- Launched Sikh Library, the largest open-source multilingual dataset in the Sikh community, building a custom OCR pipeline and publishing the dataset on HuggingFace for use by 13+ independent projects worldwide; designed and shipped a robust learning platform containing 558+ courses built from the Sikh Library dataset using Claude Code.

Technical Program Manager, Dosanjh Labs, Seattle, WA — March 2026 — Present

- Built and launched 12 live security & compliance products, owning product strategy, roadmaps, and end-to-end SDLC from requirements through CI/CD deployment while continuing to expand early-stage releases, using Claude Code.
- Built and launched Sightline, a GRC platform providing a unified view of compliance posture across 22+ frameworks by integrating data from organizational tools and systems into a single compliance dashboard.

Technical Project Manager, University of Washington, Seattle, WA — Jan 2025 — March 2026

- Served as CIO & System Security Officer for UW's Center for Social Science Computation & Research (CSSCR), managing data servers and personally executing and certifying the secure destruction of restricted research and healthcare data.
- Administered 40 servers across multiple campus locations and led NIST SP 800-53 security audits for the College of Arts & Sciences, identifying control gaps and supporting remediation planning.
- Led the Speech and Hearing Sciences Clinic IT onboarding as Project Lead, conducting HIPAA security audits and coordinating five healthcare vendors, clinicians, and infrastructure stakeholders to resolve systems and server issues.
- Eliminated $30K annually in spending by leading the Speech & Hearing Sciences Clinic's transition to centralized IT.
- Operationally led a 9-person infrastructure and help desk team during a three-month leadership vacancy; managed work assignments, established formal ticket-dispatch accountability, and maintained uninterrupted college-wide service.
- Managed a $250K annual hardware lifecycle program as the team's sole Workday buyer, forecasting device needs, aligning purchases to departmental budgets, and negotiating pricing with Dell and Apple.

Senior Computer Specialist, University of Washington, Seattle, WA — Jan 2023 — Jan 2025

- Designed and administered the Windows Autopilot & Jamf enrollment and lifecycle pipeline used to deploy & provision 2,000+ devices across the College of Arts & Sciences, enabling zero-touch enrollment at college-wide scale.
- Led a six-month network security migration across College of Arts & Sciences buildings with zero downtime, creating a reusable migration framework later adopted by IT teams across other UW colleges.

Technical Program Manager, Tencent, Bellevue, WA — July 2022 — Dec 2022

- Built a complete IT environment for a new gaming studio in five months, delivering AWS infrastructure, identity & endpoint management, networking, and 100+ multi-OS workstations ahead of launch while managing a $750K budget and supervising a Systems Administrator and Project Manager.
- Designed and implemented a unified JumpCloud MDM and Google Workspace SSO/MFA identity architecture that was adopted as the standard across Tencent studios in Los Angeles and Montreal.

Lead Apprentice Systems Tech, Meta, Seattle, WA — Aug 2020 — Feb 2022

- Mentored 30 technicians and externs, including 20 Year Up externs & 10 enterprise support techs, contributing to five extern conversions to full-time roles and helping the PNW Enterprise Support team rank #1 nationally in ticket resolution.
- Authored Linux porting documentation adopted by Meta's Director of Enterprise Operations and BeyondTrust as a 1st-party supported solution, resolving compatibility issues for 5,000+ AR/VR engineers.

Lead Technical Consultant, Rochester Community Schools, Rochester, MI — Aug 2019 — Nov 2020

- Served as the operational IT lead during the COVID-19 response, directing six technical assistants across seven schools to complete a 1:1 Chromebook rollout and full asset inventory supporting 15,000 students across 31 schools in eight weeks.
- Developed a Google Workspace remote-learning curriculum adopted district-wide to support teachers and students during the transition to remote instruction.

Technical Project Manager (Contract), Chef Koochooloo, Mountain View, CA — Aug 2019 – Nov 2019

- Helped position the startup for $2M+ in funding from Nestlé and the Chilean government by defining MVP requirements, overseeing development, coordinating game-development vendors and developers, and managing stakeholders through launch across multiple Mountain View schools.

Department Shares Administrator (Internship), Oakland University IT, Rochester, MI — Jan 2020 — April 2020

- Managed and mentored student IT technicians while improving file-share, onboarding, and support workflows, reducing ticket requests by 40%.

Technology Services Mentor, Oakland University Kresge Library, Rochester, MI — May 2018 — Jan 2020

- Trained university employees across Mac, Windows, and Linux environments while resolving 30% of the team's tickets.
- Reduced onboarding time by 40% by developing standardized documentation and leading the hiring and training of new work-study employees.

Front Desk Coordinator, Oakland Community College Athletics, Auburn Hills, MI — Aug 2016 — April 2018

- Reduced reservation-related support tickets by 90% by leading an overhaul of the athletics and student-club room reservation system.
- Managed facility and technology equipment supporting more than 10,000 students, faculty, and community members.

Education & Certifications

- Bachelor's in Interdisciplinary Studies, with Minor in Information Technology — Oakland University
- PMP Certification — In progress (studying for the exam)
- Jamf Pro Certified Technician; Google Cloud Digital Leader; Cloud Security & Audit Fundamentals (AWS, Azure, GCP); InfoSec Cyber Incident Response; CPMAI Micro-Credential (PMI); HIMSA NOAH Product Support Engineer

Leadership

- Speaker & Educator, Basics of Sikhi — June 2024 — Present | Delivered 100+ educational presentations across universities, Sikh Gurdwaras, and interfaith events in the U.S., Canada, U.K., and Malaysia.
- Board of Directors, University of Washington Professional Staff Organization — July 2024 – March 2026 | Chaired IT Committee supporting organizational technology and served as a voting member on UW Faculty Councils covering IT & Cybersecurity, Research, Faculty Benefits & Retirement.
- Director of Development, GrizzHacks — Feb 2019 — Dec 2020 | Led development teams building the GrizzHacks website and internal hackathon tools while coordinating with sponsors and leading technical workshops during hackathon events.
